

SATELLITE

EUTELSAT 65 WEST A

MULTI-MISSION SATELLITE FOR LATIN AMERICA

C-BAND DOWNLINK COVERAGE

EUTELSAT 65 West A serves expanding markets in Brazil and Latin America.

EUTELSAT 65 West A is a tri-band satellite designed to target fast-growing video and broadband markets across Latin America.

Its high-power Ku-band payload enables DTH reception of digital and HD channels across Brazil and facilitates corporate connectivity in Central America, the Caribbean and the Andean region.

The satellite also features a transatlantic C-band coverage for cross-continental video contribution and distribution, as well as a Ka-band payload for broadband access across Brazil and Latin America.

A far-reaching antenna seeding programme for Brazilian cable operators has been completed. This will enable broadcasters to enhance their reach to 12 million homes, and cable operators to enrich their offer via the 65° West video neighbourhood.

MULTI-MISSION SATELLITE FOR LATIN AMERICA

KU-BAND AMERICAS DOWNLINK COVERAGE

KU-BAND BRAZIL DOWNLINK COVERAGE

KEY MARKETS
